SUMMARY

I'm a Front End Engineer who adores problem solving. Web is my passion. All technologies that step in daily in our lives in the web industry makes it so hard to keep up, but this is the point that make it so energizing and kicking me up to be up to date, observing, learning and doing wonderful stuff every day, that's why i'm in love with my work and committed to it.

PROFESSIONAL EXPERIENCE

Seera Group (Almosafer , Tajawal)

Frontend Team Lead   Jan 2020 – Present

As Frontend Team Lead at Tajawal, I inspire day to day demonstration of Tajawal values. I'm willing to walk the talk & positively project the face of the brand, Pushing my team to be the best through daily short sessions about topics they need to develop on. and always discussing with the team members the best approaches to tackle each problem we face.

Senior Frontend Engineer   May 2017 – Jan 2020

As Frontend engineer at Tajawal. I'm taking ownership for the main search form for flights/hotels. and delivering features for flights product as well with high quality standards and high sense to details regarding implementation, Sharing my knowledge with the team through sessions, articles and providing my feedback and suggestion to improve the overall workflow and development cycle.

Jobzella

Frontend Engineer   Jul 2015 – May 2017

As Frontend engineer at Jobzella i maintain the Frontend and enhance the user experience to meet the users and customers satisfaction using the cut edge front end technologies such as HTML5, CSS3, SASS, JavaScript, Responsive Design, jQuery, AngularJS, VueJS, Webpack, GulpJS and GIT.

Freelance

Frontend Developer   Jul 2011 – Jul 2015

Working as Freelance has helped me to face a lot of problems which gained me a lot of experience, and pushing me to always learn to stuff to keep up.

UI Developer   Oct 2009 – Jul 2011

In this period in my career i was very interested in building full page layouts without any frameworks which gained me a lot of experience in symantics, scalabale structure and code reuse.
